

Roman Blinds

New trends of minimalistic expression characterize various collections of Roman Blinds.

With their clean, sophisticated lines, Roman Blinds, or Roman shades are one of the most stylish ways to dress up a window.

All the advantages of Roller Blinds regarding the solar protection are provided in addition with a sense of delicate nobility and the option of original creation in combination with fringes or other finishes.

The Roman Blinds are offered in a selective range of textiles which not only offer shading but also satisfy the aesthetic needs of spaces with high demands.

An impressive collection of fabrics and natural materials such as bamboo, screen wood or woven patterns are available.

- **Oeko-tex Standard**
Environmentally friendly. Tested for harmful substances.

ROMAN BLINDS TECHNICAL SPECIFICATIONS & FEATURES

■ **HEAD RAIL** - aluminium in white colour, with various models available for different sizes.

■ **NO-SEW EASY-FIT SYSTEM** - the use of the patented Romatech system and aluminium profiles ensure that creases are perfectly aligned and eliminate stitch holes and fabric snagging, the lining tearing or misalignment of the batten. The Romatech aluminium system is attractive both at the front and back of the blind.

■ **THE BOTTOM BAR** is available in PVC or aluminium and is covered with the same fabric for aesthetic reasons. There is an additional finishing option, where the profile used for the bottom bar has an additional channel offering the possibility of decorative finishes.

■ **THE FINISHING** - usually the finishing is simple, with just the bar at the bottom. However, a wide variety of special finishes are also available.

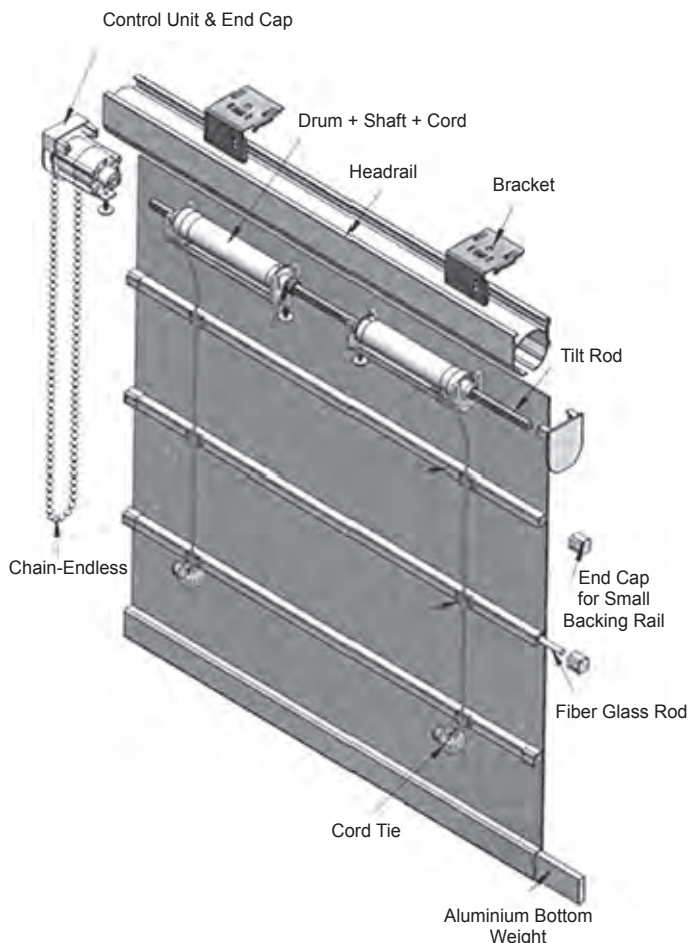

■ **FINISHES** Finishes are in various shapes (Classic, Colonial, Provence, Castille, Temple, SC-1, SC-5, SC-10, SC-11, SC-12). All these shapes are illustrated on the roller blind catalogue. It is also possible to be decorated with fringes and for the particular meander shape finishing various rods and finials could be selected.

■ **CONTROL** - endless plastic chain, available in various colours, plastic chain weight in matching colours.

■ **MOTORISED** operation can be provided on request. The motor can be controlled manually by switch, automatically by remote control or by a solar sensor.

■ **MADE TO MEASURE** - the Roman Blinds are manufactured to the specific dimensions required, providing a perfect fitting.

■ **TIMBERTECH DECORATIVE STRIPS** - Decorative flat front batten can be used for more aesthetic look. This system delivers all of the advantages of a timber look, without the environmental issues often associated with the use of natural wood. Timbertech strips are available in various finishes in order to match with each fabric (Birch, Cedar, Natural, Walnut, Silver, etc).
