

Woven & Wooden Blinds

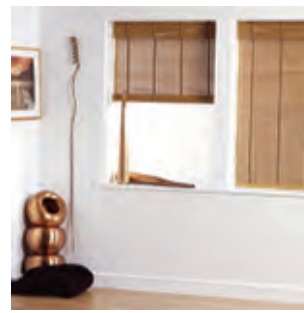

The Woven and Wood collection is available in a range of Roll up, Roman style, Roller Blind Style and Panel System woven blinds.

They are made from specially selected genuine wood, bamboo, woven paper, jute and raffia products providing a tremendous choice of natural and fully functional window blinds that can be custom made to satisfy all styles and shape of window.

The woven blinds are available for a very wide range of applications as shading system and interior design, wall covering, sliding panels, room separation, etc.

 **The types of wood used manufacture wooden blinds are taken from selected forests in which the system of reforestation is implemented through controlled felling of trees and their replacement.**

Slats are UV protected for best resistance and durability but the colour stability can be influenced by the sun exposure and colour deviation is possible.
