

## Motorized Curtain Rails

- Designed to offer high technology and top performance.
- Good choice for curtains with huge dimensions or heavy textiles.
- Suitable for large rooms and theatres, public and commercial buildings.
- The curtain opening can be central, lateral or asymmetric.
- Systems suitable for ceiling or wall installations.
- Curved tracks with wide radius centring.
- Smooth operation.
- Drive effected by 230 V synchronous motors, the final positions are freely adjustable according to your requirements.
- The motors, also available in a high speed version with a velocity of 190 mm/s, can ideally be mounted upwards so that they are largely covered by the fabric.
