

## Wooden Venetian Blinds

- 25, 35 & 50mm with Cords
- 35 & 50mm with Chain

Wood is the material that nature itself offers in order to add warmth and give character to a room.

The use of **Wooden Blinds** ensures harmony of colour in all indoor spaces in addition to providing effective quality shading.

The very large range of colours and natural wood hues makes it extremely easy to choose your wooden blinds according to your furnishings.

Wooden Blinds with chain are the perfect choice as they are easy to fit into practically any design, be it conservative or contemporary. For decorative purposes, the way in which the slats are linked to each other can be selected for interesting contrasts using the ladder tapes or a more classic look with the cord. Easy to operate thanks to the versatile chain mechanism these blinds can help you easily control the amount of light that enters your room.

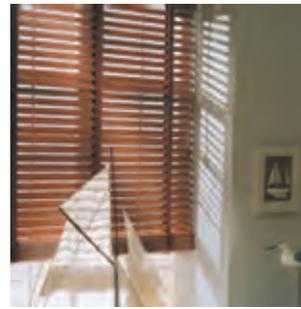

The head rail 50x50mm is available in white, silver, brown and beige to match with the slats and interior decoration.

The front side of the head rail has been designed with an insertion channel giving the possibility to insert a slat inside to blend harmoniously with the slats and other window treatments and furnishings.

Basswood slats 50x3mm, 35x3mm  
Maximum width - 8ft

 **The types of wood used manufacture wooden blinds are taken from selected forests in which the system of reforestation is implemented through controlled felling of trees and their replacement.**

Slats are UV protected for best resistance and durability but the colour stability can be influenced by the sun exposure and colour deviation is possible.

## TECHNICAL SPECIFICATIONS & FEATURES

■ **The finest natural wooden slats** are highly processed to ensure great resistance to Ultra Violet rays (UV Protection coating).

■ **The natural insulation** properties of the wood contribute to thermal insulation of the space.

■ Wooden blinds are available in either 25mm, 35mm or 50mm slats of 3mm thickness in a variety of colours.

■ **Cords and ladder braid** (optionally) are also colour matched.

■ **The head rail** for 25mm and for 35mm wooden blinds is 50x50mm and 61x28mm respectively for the 50mm wooden blinds. On the electrical operated wooden blinds are used 58x51mm head rails.

■ **The head rails** are covered by a matching moulded wooden valance for a better aesthetic effect.

■ **The bottom rails** are made of genuine wood the same colour as the slats to enhance the finish of the 25, 35 or 50mm wooden blinds.

■ **The cords** are available in a wide range of colours harmonious matching with the slats.

■ **For tilting** are used needle weaving cords 2mm or 2.5mm according to the wooden blind system (25, 35 or 50mm).

■ **The cords** for raising and lowering of the blinds are also 2 or 2.5mm needle weaving.

■ **The fixing brackets** are made of reinforced metal to ensure easy and safe fixation.

■ **The automatic cord lock** is made of metal in order to be much resistant and support great weight.

■ **The ladder braid** supports for wooden blinds are made of reinforced plastic fibre glass with built-in pulley for easy operation.

■ **Optionally electric operated control** could be provided using motors with switch, remote control or automatic sun sensor control.

■ **Wooden blinds are made to measure** for any particular request.
