

Verti Zip

Verti Zip vertical shading system with side guides and hidden zipper.

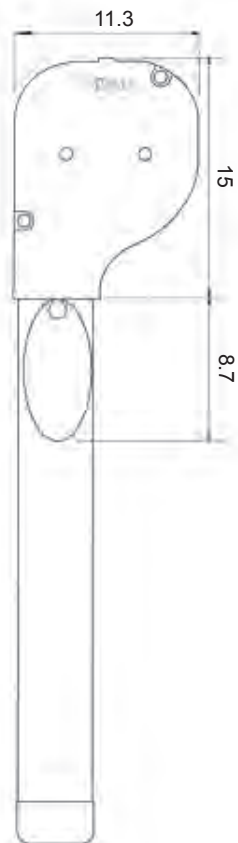

It is a functional vertical shading system with celluloid or PVC that protects from the rain and the wind. It includes an aluminum box in which the PVC or celluloid is wrapped and side guides with hidden zipper, which allow the material to roll comfortably and at the same time always remain tight.

The maximum cover dimension is 4,00m x 3,00m. The metal parts are electrostatically painted in white colour. The tube is F70 with imported channel. Motion can be controlled either by an imported 1:3 mechanism or by motor.
