

ALHAMBRA

FABRICS WITH A MEDITERRANEAN SOUL

Alhambra presents its new collections, in which fabrics become an experience, a sigh and a certain moment. A way to turn Mediterranean serenity into fabrics to share your home with you.

We know what it means to live in this world in which everything goes so fast. This is why, having you in mind for this launch, we have created three collections, different but with the same plot thread: slow living.

Despacito has been designed inspired by the gesture of the Pause as a collection that turns our fabrics into mediators in your life. With Le Soleil, we wanted to turn the harmony, calm and joy of the whisper of the Mediterranean Sea into fabrics that express the essence of our land from the inside of your home to the outside. Finally, Sunshine is the breath, the necessary pause that captures the magic of the sun, a unique moment to connect with yourself and with the nature that surrounds you.

These collections are not just fabrics; they are an invitation to vibrate with the beauty of calmness and harmony, to establish an intimate bond with nature and to find peace at home. Each design, each thread and each texture tell a story. We hope they will go with you on your way to the serenity you seek in modern life.

A new way of enjoying every moment: living a transformed present.

DESPACITO, LE SOLEIL, SUNSHINE

ELEGANCE IN A SUNBATH

Under the light of the Mediterranean sun emerges the Le Soleil collection, a tribute to the serene and relaxed life that emanates from our land. This collection is composed of eight special and unique designs – Calas, Costa, Horizonte, Islote, Océano, Olas, Rocas and Ondas – and carries in its fibres the essence of our origin like a soft breeze that caresses your skin.

Le Soleil is not just another outdoor collection – one of its most important features is that it is fireproof, which makes it an exceptionally suitable choice for projects that seek safety in addition to elegance. With a standard width of 140 cm and weights ranging from 570 to 840 grams, these strong and durable fabrics are the perfect choice for upholstery, gracefully withstanding the passage of time and the rigors of the weather.

Polypropylene, the material these fabrics are made of, is a versatile and durable thermoplastic polymer. It offers excellent chemical properties and low moisture absorption, and stands out for its electrical insulation capacity. In addition, it is a lightweight material, which guarantees its durability and adaptability to different environments.

This collection, Le Soleil, is like a ray of sun that lights up every corner of your projects, reminding you of the peaceful beauty of the Mediterranean that inspires us every day. Dive into the outdoor life with elegance and safety and let the warmth of Le Soleil transform your spaces into havens of calm and sophistication. Le Soleil is the perfect harmony between practicality and beauty, where inspiration merges with safety, like a walk along the Mediterranean coast that brings you closer to your roots.
