## Sunflower, the flower of the sun

“Sunflower.

The flower of the sun. It follows the sun from the first moment it rises, until it sets.

After careful observation and decoding all its secrets, we, here at Euroblinds, have managed to befriend the sun and are aware of when it can be friendly and when it can be dangerous.

At Euroblinds we have the necessary know-how and technical expertise needed to offer you the optimal solution to your interior and exterior shading needs.

So that the sun will become your friend, whenever you wish!”

## Our story

We are a leading company in the shading sector since 1969.

We focus on our customers' real needs, offering complete shading solutions for interior and exterior spaces, creating the ideal conditions needed for a comfortable and pleasant environment throughout the seasons, regardless of weather.

Keeping up with the newest technological trends and the modern way of living, we've introduced HomeMotion, an innovative automation system suitable for indoor and outdoor shading, to facilitate everyday life.

## Thinking of our planet

Interior and Exterior Shading Systems help improve energy efficiency and saving of buildings.

During the summer months, they contribute to the reduction of thermal energy emitted to buildings, resulting in significantly lower energy consumption for air conditioning. On the contrary, during the winter, they allow thermal energy to enter and stay in the building, thus reducing energy consumption for heating.

- Safe for human use and eco-friendly textiles: OEKO TEX-certified
- We use reforestation timber in all our wooden
- We incorporate recycling practices in our workspace (aluminium, metal, paper, wood).

According to a survey conducted in the EU by ES-SO (European Solar Shading Association) and the University of Minnesota, the use of shading systems in a building can reduce energy consumption for heating up to 25%.

Households in Europe are responsible for more than 40% of the total energy consumption, emphasising on the important role of shading systems, which in turn contribute to the reduction of atmospheric pollution worldwide.

## CURTAIN/FURNITURE FABRICS

A fine selection of high-quality fabrics for curtains and furniture upholstery from prestigious European brands, in a variety of designs for you to choose from and decorate every corner of your home, exactly as you've imagined!

## Curtains

For your high-quality curtains, choose from a grand selection of fabrics for with unique designs, available in a variety of different sewing patterns for perfect fit in both modern and classic line.

## Curtain Rods

Curtain rods are essential to complement and complete the overall synthesis of your space, as they add an elegant touch, creating the aesthetic result you wish.

Large selection of curtain rods made of:

- Wood
- Iron
- Brass
- Nickel with crystal elements (Swarovski, Bohemia, Murano)

## Curtain Rails

Curtain rails made of metal or aluminium are an important additional element for every curtain and necessary to ensure proper fit and function.

Rail types:

- Home use
- For hotels
- For theatres
- Suspension system for paintings in galleries
- For hospitals / clinics
- Motorised
- Roman rails

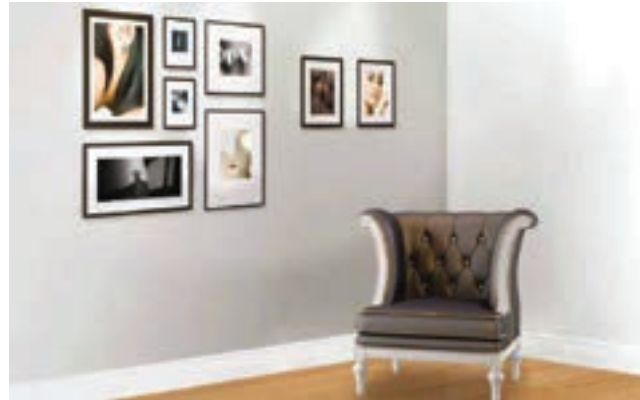

## Motorised curtain rail

The fast and silent use of the motorised curtain rail allows remote controlled operation, keeping up with the trends of modern life.

## Suspension system for paintings

The professional suspension system for paintings is ideal for art galleries, etc.

## Theatre stage rail

Motorised electric curtain mechanism with the ability to pull 35, 60, and 100kg.

## Hospital rail

Widely known for their “bed divider” use in hospital settings, operating theatres, and different hospital wings.

## EXTERNAL SHADING SYSTEMS

External Shading Systems are designed to offer

- Privacy
- Sun protection
- Energy saving
- Unobstructed View
- Air circulation
- Sound insulation
- Thermal insulation

## Rolling Shutters

### Rolling shutters are available in:

- Polyurethane profile
- Extruded aluminium profile

### Application:

1. Invisible box
2. Aluminium box
3. Manual/electric

## Invisible casings

Manufactured in Germany, the “invisible” Beck &Heun casings are installed without interfering or degrading the building's structural design.

- Completely invisible/elegant
- Sound insulation
- Thermal insulation

## External Venetian Blinds

External Venetian blinds offer effective solutions for efficient light management, as they prevent most sunlight from entering your space.

Application:

1. Invisible box
2. Aluminium box
3. Manual or electric.

## Sun Breakers

The SunBreakers external shading system is highly effective in energy saving. Its main characteristic that makes it stand out is that it blocks sunlight from reaching the building its installed.

## Awnings

Awnings are the classical exterior shading system, providing shade and sun protection.

- Folding arms awnings
- Cassette Awnings
- Vertical Awnings
- Canopy
- ZIP-type awning system
- “Veranda” awning system
- Manual or electric

## Tension structures

The retractable shading fabrics are a modern solution for outdoor spaces.

- Shading and Shelter
- Water resistance and durability in challenging weather conditions
- Σε σχήμα ορθογώνιο, τρίγωνο και τραπέζιο

## Bioclimatic Aluminium Pergolas

The sun is “on your side” and you can control or direct it as you wish, with the bioclimatic aluminium pergola.

- Frame and strips made entirely of aluminium
- Supreme durability
- Requires zero maintenance
- Ability to add lighting
- Air circulation
- Unobstructed view
- 100% sun protection

## Skyline pergola

The Skyline pergola is a modern shading solution for outdoor spaces, constructed from durable materials.

- Aluminum frame
- Moving roof
- 100% sun protection
- Waterproof
- LED lighting option

## Metal or Wooden Tent Pergola

An external shading system that aims to cater to even the most demanding tastes, whilst combining functionality with a unique aesthetic feel.

## Ready-made Aluminum / Polycarbonate Pergola

Requiring zero maintenance, its contemporary architectural design and easy installation, in both private and public spaces, make for the most functional exterior shading solution.

## Car Parking Shading System

You can now protect your vehicle and yourself with our parking space shading system.

- Ready-made system
- Aluminium frame
- Polycarbonate roof for sun protection
- Requires zero maintenance

## Parking shades

Parking shades that protect vehicles from the sun and weather conditions.

- Various sizes
- Durable metal frame and membrane
- Unique design
- Ideal for commercial and residential spaces

## INTERNAL SHADING SYSTEMS

Technologically advanced shading systems for your home or workspace.

By preventing direct exposure to the sun's rays, Internal Shading Systems offer ultimate sun protection, creating a comfortable and pleasant environment.

## Roller Blinds

Fully catering to all necessities of modern life, the Roller Blinds are now firmly established as the most popular indoor shading system for both homes and the workspace.

- Full blackout roller blinds
- Dimout roller blinds
- Perforated roller blinds
- Roller blinds with high performance fabrics (fire retardant, stain resistant, heat resistant, solar protective coating, etc.)

## Roman Blinds

A sophisticated shading system for refined tastes!

Renowned for their contemporary minimalistic aesthetic, Roman Blinds are an excellent alternative for those who want to stand out.

## Zebra/Combi Blinds

- Alternating transparent and opaque strips
- Zero, partial, or full visual access

## Silhouette Blinds

Silhouette is one of the newest innovative systems that has been designed to meet and exceed the highest of expectations.

## Illusion Blinds

This innovative shading system masterfully blends the key features of Roller, Zebra, and Roman blinds in a single system: when fully opened they function as Rollers, when lifted they function like the Zebra, and when fully folded they turn into Roman blinds.

## Sliding Panels

Sliding Panels constitute an elegant, practical, modern, and versatile shading system ideal for larger windows or patio doors, while at the same time they may also be used as room dividers.

**Choose from a wide selection of fabrics:**

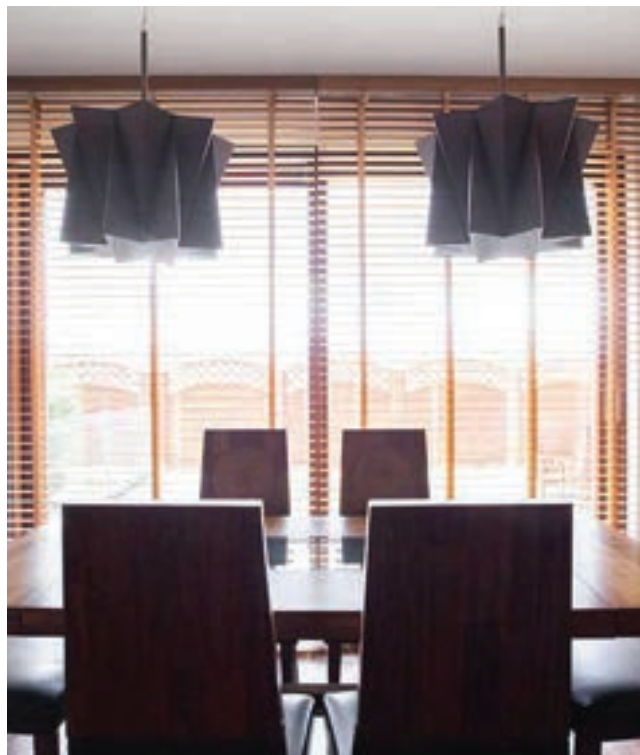

- Perforated fabrics
- Full blackout or dimout fabrics
- High performance fabrics

## Wooden Venetian Blinds

Wood, as a material offered by nature itself, adds “warmth” and accentuates the character of a space.

- Sun protection
- Efficient light management
- Wide range of colours and natural wood hues

## Aluminium Venetian Blinds

Aluminium blinds have become a staple system of internal shading.

- Sun protection
- Efficient light management
- Wide range of colours

## Vertical Blinds

A highly functional and practical shading system, vertical blinds can be installed in every space.

- Sun protection
- Visual access to the outdoors

## Interior ZIP-type Awning System

The interior ZIP-type awning system is a highly unique and most elegant choice for an interior roller, ideal for total blackout.

## Perfect Fit

This is a specialised shading system for reclining windows and aluminium doors, allowing their smooth and uninterrupted tilting, as a single body. The fitting of the Perfect Fit is made without any drilling.

## Folding Door

The folding door is ideal for dividing both small and large open spaces. Regardless of the colour you may choose, it will add a special touch to your space.

## ELECTROMOBILITY / AUTOMATION BY EUROBLINDS

Welcome to Smart Home.

Aware of how your requirements for a high quality of life, as well as for energy saving keep changing...

*... we created Smart Home.*

## Euroblinds Home Automation

Euroblinds automation system simplifies the programming and monitoring of all your home devices, making life simpler and easier!

Accessible through your mobile app, you can control your windows, shutters, blinds, lights, front gate, heating, alarm systems, surveillance cameras and sensors, and every compatible device that's connected on the same platform!

## ACCESS

Access control ensures necessary safety and protection, while simultaneously making access to your space easy and functional.

## Intercom Door Phone

House protection starts before a visitor enters through your main entrance and onto your premises.

- Provides audio and visual control
- With the ability to take pictures
- Monitor your homeregardless of where you are
- Access over the internet via a computer, smartphone, or tablet
- With the ability to monitor all shading systems, your garage door, and main gate through intercom.

## Garage Doors

Garage protection is of paramount importance, and that's why you need to make sure that your garage door is able to play an important role for the security of your family, your home, and your car.

- Automated and insulated garage door systems
- Elegance
- Maintain your car's pristine condition

## Automation for Gates

A main gate has a dual role. It serves both as an invitation and a warm welcome to your friends and family, as well as a protective shield from any unwanted individuals.

## Aluminium Paling

An Aluminium Fence is a vital element for your space as it secures your privacy and protects you from unwanted, prying eyes.

- 3 different coverage types
- Enhanced security
- Privacy
- Requires zero maintenance
- Demarcation – clearly fixes your space's boundaries
- Aesthetically upgrades your space
- Available in white and silver

No gap facade

Intermediate empty space facade

Double sided with empty space

Ready to meet your expectations,  
by offering an exceptional experience to every visitor.
